### EXPERIENCE

#### Practice Manager | Full Stack Developer

##### Crosspoint Evaluations

-  03/2017 - 09/2024  San Francisco
- Managed the entire med-legal practice for doctors and business relationships with attorney partners
  - Developed and implemented automations using cloud-based scripting and workflow platforms, reducing case processing time by 65%
  - Created Casey, a full-stack application using Vue.js and custom backend automation for seamless case management, resulting in 40% reduction in administrative overhead
  - Utilized Google Analytics for SEO optimization and managed press releases for product launches
  - Led team management, including staff priorities, training, and hiring
  - Optimized operations, enabling high productivity with a small team through custom-built tools and automations
  - Implemented scalable, serverless functionality to improve efficiency
  - Designed and implemented access control and security protocols to ensure HIPAA compliance

#### Store Manager

##### Beyond Vape

-  11/2015 - 02/2017  Manhattan
- Managed high-volume store locations in Manhattan
  - Focused on customer support and general operations in a rapidly growing business

#### Sound Engineer | Office Manager

##### Frisbie

-  05/2014 - 05/2015  Manhattan
- Worked directly with founder on large-scale music publishing campaigns (Pepsi, The Gap, etc.)
  - Managed day-to-day office activities and assisted with audio engineering

#### Recent Project

##### Casey - Comprehensive Case Management Solution

- Launched: March 2024
- Created a HIPAA-compliant, full-stack application using Vue.js for the frontend and serverless backend automations
- Integrated with Google Workspace apps (Sheets, Docs, Drive) for seamless data management and report generation
- Implemented scalable serverless operations to enhance system efficiency and reliability
- Utilized cloud storage for secure and scalable file storage, accessible through Casey's user interface
- Leveraged Google Workspace Organization for comprehensive security management and access control
- Designed and implemented IAM policies to ensure proper data access and security protocols across the organization
- Secure access to medical records and case details
- Automated scheduling and notification system
- Integrated report writing tool with pre-populated case information
- Real-time A/R overview and billing timeline
- Live chat support for immediate assistance

### SUMMARY

Full Stack Developer with 8 years in healthcare and business services, known for hands-on leadership and making tech work seamlessly for business. Led projects like Casey, a HIPAA-compliant platform built with Vue.js and Google Cloud, leveraging diverse experiences to solve real-world challenges and drive impactful innovation.
