MIKE HAYE

Full Stack Developer

(518) 763-9570 connect@mikehaye.com linkedin.com/in/michael-haye Brooklyn, NY

EXPERIENCE

Practice Manager | Full Stack Developer

Crosspoint Evaluations

03/2017 - Present San Francisco

- Managed the entire med-legal practice for doctors and business relationships with attorney partners
- Developed and implemented automations using cloud-based scripting and workflow platforms, reducing case processing time by 65%
- Created Casey, a full-stack application using Vue.js and custom backend automation for seamless case management, resulting in 40% reduction in administrative overhead
- Utilized Google Analytics for SEO optimization and managed press releases for product launches
- Led team management, including staff priorities, training, and hiring
- Optimized operations, enabling high productivity with a small team through custom-built tools and automations
- Implemented scalable, serverless functionality to improve efficiency
- Designed and implemented access control and security protocols to ensure HIPAA compliance

Store Manager

Beyond Vape

11/2015 - 02/2017 Manhattan

- Managed high-volume store locations in Manhattan
- Focused on customer support and general operations in a rapidly growing business

Sound Engineer | Office Manager

Frisbie

05/2014 - 05/2015 Manhattan

- Worked directly with founder on large-scale music publishing campaigns (Pepsi, The Gap, etc.)
- Managed day-to-day office activities and assisted with audio engineering

Featured Projects

Memory Archive - AI-Powered Memory Preservation Platform memoryarchiveai.com

- Built and shipped an AI-powered memory preservation platform (iOS + Android + web) featuring an AI research agent that searches the web for school records, news articles, and historical context to help users reconstruct lost memories.
- Integrated AI photo enhancement to digitize old prints and polaroids - auto-detection, perspective correction, color and sharpness enhancement - with secure family sharing, full-text search, and row-level security on every table.

PipedriveSheets - Two-Way Sync Between Pipedrive CRM and Google Sheets pipedrivesheets.com

- Built the only Google Sheets add-on offering true two-way sync with Pipedrive CRM, trusted by 200+ sales teams and listed in both the Google Workspace and Pipedrive marketplaces.
- Developed a proprietary bidirectional sync engine with conflict resolution supporting all six Pipedrive entities (deals, contacts, organizations, activities, leads, products), plus OAuth 2.0 auth, scheduled auto-sync, custom field detection, and team-level permission controls.

Casey - HIPAA-Compliant Case Management Platform caseypro.com

- Built a full-stack case management application for a med-legal practice with a Vue.js frontend and Google Cloud Run serverless functions powering the backend, featuring secure access to medical records, automated scheduling and notifications, and an integrated report writer with pre-populated case data.
- Used Google Cloud Storage buckets for secure, scalable file storage and integrated Google Workspace (Sheets, Docs, Drive) for data management and report generation; designed IAM policies and access controls for HIPAA compliance, with real-time A/R billing timelines and in-app live chat support.

SUMMARY

Full Stack Developer with 8 years in healthcare and business services, known for hands-on leadership and making tech work seamlessly for business. Led projects like Casey, a HIPAA-compliant platform built with Vue.js and Google Cloud, leveraging diverse experiences to solve real-world challenges and drive impactful innovation.
